

NMD 343 Storyboard

I want my video to show the transition of the seasons, and how harsh the Maine fall & winters can be. I'd like to do this without narration or much audio, and just let the images speak for themselves. I think it's a perfect time to do it now, because the fall is so windy and intense. It feels colder than winter a lot of the time.

Start with cloudy skies

Transition to cloudy dark skies,
to show the contrast

Begin audio of wind, have
multiple shots of stuff getting
blown around, showing the
impacts of it

End with shots of leaves
falling/getting blown around,
to show the decay of the warm
world. If possible, I'd like to
get a shot of a actually leaf
falling from a tree.
